Steel Screw Steamer "CITY OF WILMINGTON" ex "CAMINO" No.  
195 in Register Book.

Rule Dimensions:- 290 x 44 x 22 Upper Deck  
31 Shelter "

Scantling Numbers:- 67 and 19430

Proportions:- Length = 9.4 Depths to Shelter Deck.

The vessel was built by Messrs. Craig Shipbuilding Co.,  
Long Beach, California, in 1912, and classed in the Bureau Veritas.

The New York Surveyors have surveyed the vessel and they  
now forward a First Entry Report giving the scantlings as found  
by them, together with various structural plans approved by Mr.  
French.

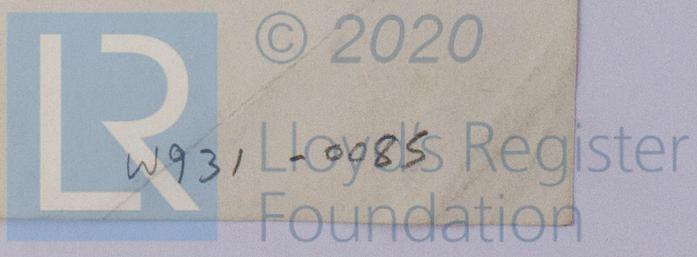

The Surveyor states "that the materials and workmanship are  
good and that the requirements of Section 48 of the Rules for  
vessels not built under survey have been complied with, and  
that the whole of the requirements for Special Survey 2nd No. 3  
have been carried out. The whole of the scantlings have been  
verified with the plans approved in the New York office and the  
same found to be in order".

The scantlings of the vessel as stated on the First Entry  
Report and plans have been examined, and compared with the Require-  
ments of the Rules. It is found that they are such as can be  
recommended to the Committee for approval as being equivalent to  
the requirements of the rules for the LOOAL class.

It is submitted the vessel is worthy to be classed LOOAL  
Shelter deck with freeboard.
