ry due Screw shaft survey due September 1916.

In September last the Owners' Superintendent informed the Sunderland Surveyors that the above survey would be held on the occasion of the next dry docking of the vessel, and, in the circumstances, the Committee deferred action in the matter for a time.

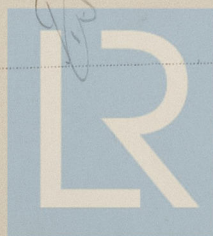

The Aberdeen Surveyor now writes the Owners have informed him that arrangements have been made to fit the vessel with Vickers Patent "Otter" Submarine Protection and it is intended to dock her for this purpose at an early date when the screw shaft will be drawn in for examination.
