

S.S. "ZAMZAM".

Dimensions:- 467' x 54' x 35.5'

This vessel was built in 1909 and is classed 100A1.

A letter has been received from the Alexandria Surveyor forwarding plans shewing structural alterations to the upper decks which the Owners propose to make in order to increase the number of passengers.

From the first entry report it would appear that the equipment supplied to this vessel was one grade above that required by the Rules, and is therefore suitable for the vessel as altered.

It is submitted that provided the arrangements be carried out as shewn and amended on the plans and to the Surveyors' satisfaction, the same will merit approval.

The Surveyor should also be informed that an expansion joint should be fitted at the forward and after ends of the bridge deck, to relieve of any stresses the deck structure now proposed to be fitted in the wells.
