Haren,
Groningen,
Holland.

Dear Sir,

In connection with the vessels building at Messrs. Kusters' we have received a rather disturbing report this week that so many holes are coming blind and having to be welded and re-drilled.

We quite agree that an odd one here and there is unavoidable, but the number that he has referred to is very bad for shell plate work.

We enclose copy of letter we have sent to Kusters' today and no doubt when you are next visiting you will just give them a warning.

Yours faithfully,

for THE GENERAL STEAM NAVIGATION CO., LTD.

A. Mansfield
