

8th. March, 1919.

reference. <sup>S.</sup>  
W/D.O.

Messrs. Lloyds Surveyors,

BELFAST.

Sirs,

NO. 445.

We duly received your letter of the 27th ultimo regarding  
equipment for this vessel.

In view of the fact that the number is now only 196  
of the grade maximum, and in 2604 below the next higher grade  
of equipment we had expected that in the circumstances the equipment  
ordered would have had your approval. If you cannot agree to  
we suggest that the two 60 cwt. bowers be each increased to  
120 cwt., and that the cables be increased from 210 fathoms to  
240 fathoms.

We shall be glad to have your further observations on  
this subject.

Yours truly,

pro WORKMAN, CLARK & CO., LTD.,

W. STRACAAN, Secretary.
