

S.S. "PUNQUE"

This vessel was built in 1915 by Messrs. Flensburger Schiffsbau Ges., Flensburg.

Plans of the main and donkey boilers have now been submitted for consideration.

The scantlings of the main and donkey boilers as shewn on the plans meet the requirements of the Rules, in force at the time the vessel was built, for working pressures of 11.6 and 6.33 kgs./sq.cm., respectively.

It is submitted that provided the main and donkey boilers be examined throughout, the scantlings be in accordance with the plans and the boilers be found in safe working condition, the boilers might be accepted for working pressures of 11.6 and 6.33 kgs./sq.cm., respectively.

1. 8. 24.
