

Challenges and sketch of budget for bulkhead. (attached to file no. 1)

COPY. of a letter received

from the Society's Surveyor at Lisbon dated the 2nd June, 1924.

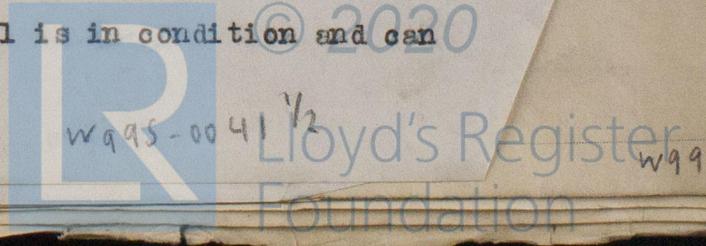

Dear Sir,

The Sociedade Maritima Ltda., who have bought the s.s. "GOA", "CUNENE" and "AMARANTE", have just called requesting that these vessels be surveyed, the first two to be continued as classed and the "AMARANTE" for classing in Lloyd's and as soon as the vessels are classed with the Committee's approval and sanction I propose that bottom and hull, tail shaft, sea connections, anchors and cables, chain lockers and machinery in general along with boilers be examined at this port for special second survey No.2 in the case of the s.s. "GOA", special survey No.3 in the case of the s.s. "CUNENE" so that these two vessels may continue trading and complete the special surveys within 12 months and in the case of the s.s. "AMARANTE" the survey will be commenced for classing as vessel in Lloyd's enabling her to proceed to another port to complete classing survey without being engaged for trading purposes till the vessel is fully classed, as the delay caused at this port if the whole of the classing survey is carried out now would not only take a long time but the expense would be excessive.

I have therefore to ask you to let me know by return if the Committee are agreeable and also to inform me what undertaking will be required from the Owners to guarantee Lloyd's that said classing survey of s.s. "AMARANTE" is carried out etc. fully before being put in commission. Owners of the s.s. "PUNGUE" have also approached me with regard to classing and I have told them that if the vessel is in condition and can
