

Tanker "MARKAY"

The repairs carried out in this case are extensive, but it is suggested that any appreciation of the efforts of the Surveyors concerned should at least await the safe arrival of the vessel in the United States if not the publication of the paper.

It is submitted the Principal Surveyor for the Bristol Channel be informed that the proposal to submit a paper on the repairs carried out on this Tanker, is entirely endorsed, but at the moment it is unlikely that permission to read such a paper would be granted by the Ministry of War Transport. Nevertheless it is hoped that it may be produced at an opportune time.

*Handwritten mark resembling a stylized 'A' or '7'.*

*Handwritten signature 'RBS'.*
