3174

ee.

3171. "POLARFISK." This vessel's class has been amended to  
SA- together with the notation recommended by you, except  
that the Machinery notation is LMC(R)7,47, subject, etc. The  
vessel will be eligible for the re-instatement for the figure 1  
when the equipment has been brought up to Rule requirements.

3174. "OVAL." As recommended. In reply to your letter of the  
22nd ultimo I would confirm that 1 1/8" is the correct diameter  
of the chain cable and would explain equipment letters appearing  
in the Register Book in red are only assigned for purposes of  
fee-assessment and do not necessarily bear any relation to the  
equipment actually on board on the ship. You will find this  
point explained on page 1 of the Key to the Register Book.
