Manchester.

21st. February, 1920.

A. H. S. Lane & J. W. H. Reid

Messrs. Schmidt's Superheating Co., Ltd. of Manchester
send at their Works on the 11th. October, 1919 and on
subsequent dates for the purpose of testing by hydraulic
pressure twenty cast steel superheater headers and elements
same intended for superheaters to the order of Messrs.
Cammell & Jackson, Ltd. of Glasgow for their Engines
483.

The cast steel headers were tested in accordance with
requirements of the Society's Rules.

The finished headers were tested by hydraulic pressure
in presence to 660 lbs. per square inch and 10 of
elements to 2400 lbs. per square inch with satisfactory
results.

The headers are stamped :- LLOYD'S TEST 660 LBS. —
with date of hydraulic test and with
identification.

: £ 2-2-0.
