

C.1329.

MANCHESTER.

2nd May 1921.

J. McI REID & D.M. CHAPMAN.

Messrs Marine & Locomotive Superheaters Ltd, of Manchester attend at their works on the 26th and 29th April 1921. for the purpose of testing by hydraulic pressure twelve pressed ^{STEEL} headers and elements for same intended for Superheaters to the order of Messrs W. Beardmore & Co, of Dalnair for their Contract No. 622.

The pressed steel headers were tested in accordance with the requirements of the Society's Rules.

The finished headers were tested in our presence by hydraulic pressure to 600 lbs per square inch and 10% of the elements to 2400 lbs per square inch with satisfactory results.

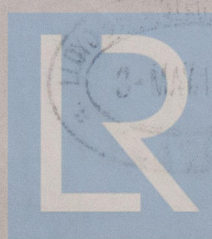

The headers are numbered:- AC 1.4.5.6.7.8.9.10.13. 14.15. and 21.

The headers were stamped - LLOYDS TEST 600 LBS - with date of hydraulic test and **DMC** for identification.
