

S.S. "MAZORCA"

It is submitted a copy of this cablegram be sent to Mr. Röli at Oslo, who should be asked for any remarks he may have to make upon it.

Mr. Röli's attention should be drawn to the fact that the 4th Special Survey No.2 of this vessel was commenced in Oslo in May, 1932, and completed in May, 1933, and it appears from the reports that no structural repairs of any moment were effected to the vessel due to wear and tear.
